EDUCATION

Grambling State University

Jan 2024 – Dec 2027

Bachelor of Science in Computer Science, GPA: 3.9/4.0

Grambling, LA

Relevant Coursework: AI/Machine Learning, Deep Learning, Software Engineering, Data Structures & Algorithms, Probability & Statistics, Linear Algebra

Honors & Awards: EICOP 2026 Finalist, Earl Lester Cole Honors Scholar, President's List, TechWise Fellow (Google/CMU), NASA L'SPACE Scholar, ColorStack Fellow

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, SQL, R, HTML/CSS

Frameworks & Tools: React, Vite, Node.js, Flask, Tailwind CSS, Prisma, PostgreSQL, Git, Vercel, Figma, Tableau, PowerBI

AI/ML: PyTorch, TensorFlow, scikit-learn, Hugging Face, MLflow, Weights & Biases | Classification, CNNs, Transfer Learning, Feature Engineering, Prompt Engineering

AI Dev Tools: Claude Code, GitHub Copilot, Cursor, Gemini (for scaffolding, research, code review, and cross-stack feature dev)

EXPERIENCE

Data Analytics Intern - Edwards Research & Innovation Center (ERIC)

Jun 2025 – Jul 2025 | Memphis, TN

- Engineered end-to-end ML pipelines in scikit-learn, automated feature engineering, preprocessing, and model training across 4 years of alumni data; findings adopted by City Leadership to restructure program design
- Applied classification models to 3,000+ records to surface 4 key student success drivers; delivered interactive Plotly dashboards for stakeholder decision-making
- Metrics:** 96% model accuracy; dashboards directly informed data collection restructuring across Memphis nonprofit City Leadership / Choose901

PROJECTS

Autonomous Research Summarizer Agent | Python, Anthropic Claude API, Flask, BeautifulSoup

[GitHub](#)

- Developed an autonomous AI agent that polls the NightShift AGI job marketplace, accepts research paper summarization tasks, and delivers consistent 6-section structured summaries (problem, method, findings, limitations, audience) without human intervention
- Integrated Claude API with prompt caching and engineered a resilient HTTP client with session-cookie auth, graceful 409 conflict handling, and per-job error isolation so failed tasks never crash the polling loop
- Implemented arXiv PDF-to-abstract URL normalization via BeautifulSoup/lxml; exposed a Flask health check endpoint via daemon thread for uptime monitoring and cloud deployment readiness (Railway, Render, Fly.io)

Mentoria - Full-Stack Scrapbook App (Product Lead) | React, Node.js, PostgreSQL, Prisma, Tailwind CSS

[GitHub](#)

- Architected and shipped a full-stack app with React + Node.js frontend and a PostgreSQL/Prisma backend supporting multi-user concurrent sessions with media storage, retrieval, and analytics
- Designed normalized relational data model and RESTful API endpoints; led 4-person team from architecture through production deployment in 4 weeks using Agile sprint cycles
- Leveraged Claude Code and Cursor for cross-layer code review and scaffolding, accelerating frontend-backend integration and reducing context-switching overhead across the stack

Personal Portfolio Website | React, Vite, Tailwind CSS, Vercel

[GitHub](#)

- Designed and built a responsive single-page portfolio in React + Vite with a custom dark-mode UI, dynamic project modals, scroll-linked navigation, and an embedded PDF resume viewer
- Deployed to production on Vercel with Vercel Analytics integrated; iterated on layout and content hierarchy based on recruiter readability principles
- Architected component structure with Tailwind CSS utility classes for consistent design tokens and rapid iteration; no external design system dependencies

Eye Disease Diagnostic System | Python, Flask, SQL, scikit-learn

[GitHub](#)

- Built an ML diagnostic system classifying ICD-10 ophthalmology codes (H00–H59) across severity levels using scikit-learn and Flask
- Engineered a Flask REST API with SQL backend enabling real-time diagnostic query workflows with audit-traceable retrieval

- Converted clinical ICD-10 taxonomy into ML-ready feature vectors, bridging medical domain knowledge with model input engineering

AI Breast Cancer Detection | *Python, PyTorch, scikit-learn, MLflow*

[GitHub](#)

- Trained and benchmarked 5 model architectures (LR, DT, SVM, KNN, RF) on the Wisconsin Diagnostic dataset; built full pipeline from preprocessing through cross-validation and F1/precision/recall evaluation
- Tracked all experiments via MLflow for full reproducibility across configurations
- **Metrics:** 99% accuracy achieved across all 5 model configurations

LEADERSHIP EXPERIENCE

Senior Resident Assistant - *Grambling State University*

Aug 2024 – Present | Grambling, LA

- Managed 8 RAs and 200+ residents; escalated welfare concerns across 3+ campus departments
- Led community programming and conflict resolution for a diverse residential population
