EDUCATION

Grambling State University

Jan 2024 – Dec 2027

Bachelor of Science in Computer Science, Biology Minor, GPA: 3.9/4.0

Grambling, LA

Relevant Coursework: AI/Machine Learning, Deep Learning, Software Engineering, Data Structures & Algorithms, Probability & Statistics, Linear Algebra

Honors & Awards: EICOP 2026 Finalist, Earl Lester Cole Honors Scholar, President's List, TechWise Fellow (Google/CMU), NASA L'SPACE Scholar, ColorStack Fellow

EXPERIENCE

Data Analytics Intern - Edwards Research & Innovation Center (ERIC)

Jun 2025 – Jul 2025 | Memphis, TN

- Partnered with nonprofit stakeholders to convert an open-ended question into a measurable analysis across 4 years and **3,000+ records**, isolating the **4 strongest predictors** of student success
- Shipped interactive Plotly dashboards that let non-technical decision-makers self-serve, then presented findings to external stakeholders: **adopted by City Leadership** to restructure Choose901 program design and their alumni data collection process
- Built the underlying scikit-learn pipeline end-to-end, reaching **96% model accuracy** and owning the work from problem framing through final stakeholder presentation

PROJECTS

Pona - Food Safety Analyzer (Product Owner, live) | Python, FastAPI, React, PostgreSQL, Tesseract

[Live](#) | [GitHub](#)

- Ran a **20-respondent user study** before writing code; **11 of 20** were failed by existing methods, reframing the problem from missing information to unreadable labels and setting MVP scope
- Shipped the scoped MVP to production; barcode and label-photo checks against a user profile, **94.5% allergen recall** benchmarked on real product data, now covering 25+ conditions rather than allergies alone
- Defined what the product refuses to do: it never declares a food safe, does not rate nutrition, and returns an explicit error for unbuilt features instead of a plausible guess

Autonomous Research Summarizer Agent | Python, Anthropic Claude API, Flask, BeautifulSoup

[GitHub](#)

- Designed and shipped an **autonomous agent** resolving a multi-step workflow end-to-end: poll marketplace, claim task, fetch and normalize the paper, summarize, deliver, with zero human intervention per job
- Specified the 6-section output schema around reader decision-making rather than model capability, and cut per-job API cost via prompt caching
- Delivered to an external partner as a working demo running on their platform instead of a spec; deployed to production on Render with uptime monitoring

Mementoria - Full-Stack Scrapbook App (Product Lead) | React, Node.js, PostgreSQL, Prisma, Tailwind CSS [GitHub](#)

- Led a **4-person team** from architecture to production deployment in **4 weeks** across Agile sprints, cutting non-essential features to protect the launch date, shipped on schedule
- Defined the data model and REST API contract as the spec both sides built against, letting frontend and backend work in parallel and eliminating integration rework
- Ran cross-layer review with Claude Code and Cursor, keeping a distributed team unblocked across frontend and backend work

LEADERSHIP EXPERIENCE

Senior Resident Assistant - Grambling State University

Aug 2024 – Present | Grambling, LA

- Manage **8 RAs and 200+ residents**; coordinate welfare escalations across **3+ campus departments** and lead community programming and conflict resolution for a diverse residential population

TECHNICAL SKILLS

Product: User research & customer discovery, MVP scoping, OKRs & success metrics, competitive & build-vs-buy analysis, product data analysis, roadmap prioritization, Agile/sprint planning, stakeholder presentation, Figma

AI/ML: LLMs & Agentic AI (Anthropic Claude API, prompt engineering, prompt caching, agent design), NLP, Computer Vision, PyTorch, TensorFlow, scikit-learn, Hugging Face, MLflow

Data Architecture: SQL, PostgreSQL, Prisma, relational data modeling, REST API design, feature engineering | Tableau, PowerBI, Plotly

Languages & Build: Python, JavaScript, Java, C++, R, HTML/CSS | React, Vite, Node.js, FastAPI, Flask, Tailwind CSS, Git, Vercel, Render | Claude Code, Cursor, GitHub Copilot
