EDUCATION

Grambling State University

Jan 2024 – Dec 2027

Bachelor of Science in Computer Science, Biology Minor, GPA: 3.9/4.0

Grambling, LA

Relevant Coursework: Data Structures & Algorithms, Software Engineering, AI/Machine Learning, Deep Learning, Probability & Statistics, Linear Algebra

Honors & Awards: EICOP 2026 Finalist, Earl Lester Cole Honors Scholar, President's List, TechWise Fellow (Google/CMU), NASA L'SPACE Scholar, ColorStack Fellow

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, SQL, R, HTML/CSS

Backend & Data: FastAPI, Flask, Node.js, REST API design | PostgreSQL, Prisma, relational data modeling | pytest, regression testing

Frontend & Deploy: React, Vite, Tailwind CSS | Git, Vercel, Render, Agile/sprint planning

AI/ML: PyTorch, TensorFlow, scikit-learn, Hugging Face, MLflow | LLMs & Agentic AI (Anthropic Claude API, prompt engineering, prompt caching, agent design), NLP, Computer Vision

AI Dev Tools: Claude Code, Cursor, GitHub Copilot, Gemini

EXPERIENCE

Data Analytics Intern - Edwards Research & Innovation Center (ERIC)

Jun 2025 – Jul 2025 | Memphis, TN

- Engineered end-to-end ML pipelines in scikit-learn across 4 years and 3,000+ records, automating feature engineering, preprocessing, and model training to reach 96% accuracy
- Applied classification models to isolate the 4 strongest predictors of student success; shipped interactive Plotly dashboards adopted by City Leadership to restructure Choose901 program design and their data collection process
- Partnered with non-technical stakeholders to translate an open-ended question into concrete requirements, owning the work from problem framing through final presentation

PROJECTS

Pona - Food Safety Analyzer (live, in active development) | FastAPI, React, PostgreSQL, Python, Tesseract OCR [Live](#) | [GitHub](#)

- Built and deployed a full-stack food safety analyzer (React/Vite frontend, FastAPI backend, PostgreSQL) checking products by barcode or label photo: **94.5% allergen recall** benchmarked across 22,799 allergen tags
- Replaced a fine-tuned DistilBERT normalizer measuring **F1 = 0.00** with rule-based matching at 94.5%, then stripped torch, transformers, and faiss from the stack entirely
- Hardened against silent failure: a capabilities endpoint reports what actually works, unbuilt routes return explicit errors rather than guesses, and **81 tests** cover every known failure mode

Autonomous Research Summarizer Agent | Python, Anthropic Claude API, Flask, BeautifulSoup [GitHub](#)

- Designed and shipped an **autonomous agent** resolving a multi-step workflow end-to-end; poll marketplace, claim task, fetch and normalize the paper, summarize, deliver, with zero human intervention per job
- Integrated against a live third-party API with session-cookie auth and graceful 409 handling, isolating per-job errors so a single failure never halts the polling loop
- Deployed to production on Render with a Flask health-check endpoint for uptime monitoring, and cut per-job API cost via prompt caching

Mementoria - Full-Stack Scrapbook App (Product Lead) | React, Node.js, PostgreSQL, Prisma, Tailwind CSS [GitHub](#)

- Led a **4-person** team from architecture to production deployment in **4 weeks** across Agile sprints, cutting non-essential features to protect the launch date; shipped on schedule
- Defined the normalized data model and REST API contract as the spec both sides built against, letting frontend and backend work in parallel and eliminating integration rework
- Built drag-and-drop media canvases and paged 3D page-flip interactions over a PostgreSQL/Prisma backend supporting multi-user concurrent sessions

LEADERSHIP EXPERIENCE

Senior Resident Assistant - Grambling State University

Aug 2024 – Present | Grambling, LA

- Manage **8 RAs and 200+ residents**; coordinate welfare escalations across **3+ campus departments** and lead community programming and conflict resolution for a diverse residential population
